I have wide and varied Script Supervising/Continuity experience on commercials, feature films, and television productions and a broad knowledge of both practicing and educating in continuity and photography. I trained in continuity at the Australian Film Television and Radio School, Sydney, in 1995.

My background is in photography. I operated my own photographic business specializing in magazine and PR work. I continue to do a small amount of photography work and academic study. During the last ten years, I have predominantly worked on overseas commercials as their short duration fitted with family demands. These large budget TVCs have allowed me to work with the latest technology, prominent directors, producers, and DOPs.
