

KAHURANGI HINGSTON-MILL

VFX / Production

I have worked in the film and television industry for over four years. I am passionate about working in this industry and through my work experience have gained a broad set of skills. I'm a strong communicator, comfortable liaising with external vendors and other departments. A key part of my role during post as VFX coordinator has been to record feedback from the supervisor and communicate that effectively to vendors. I've gained valuable technical skills including understanding and organising large amounts of data and maintaining a database of information. I've worked on and off set and I'm familiar with the process of a shoot day, I enjoy being part of a crew and working with a great team.
